

## Vocational School Program

- Each time a pre-approved vocational school locally purchases five Hutchins **Legacy** sanders, they will receive an additional sander of their choice at no charge. This sander will be shipped from our Pasadena facility to either the distributor for delivery or directly to the vocational instructor if the distributor requests.
- Proof of purchase with model and serial numbers must accompany any request for no charge tools.
- Requests for tools at no charge must be submitted on a Demo Tool Request Form or the distributor's letterhead. A Hutchins seminar for the students must be scheduled with the school by the Hutchins representative and should be included on the request form.
- Provided the vocational school returns the warranty card to the factory, Hutchins Mfg. Co. will maintain the tool's repairs for the life of the tool at no charge. It is recommended that all Hutchins tools be returned at the end of the school year for refurbishing to allow adequate time for the repairs. Tools under this program must be maintained and use a Hutchins pad – See Hutchins Vo-tech Maintenance (TC025)
- Hutchins Mfg. Co. will convert any Hutchins tools owned by the vocational school to vacuum assist or multi-option at 50% off our suggested resale prices.
- Only “not for profit” vocational institutions will be considered for this program.
- Hutchins tools may be made available for exceptional students at a reduced cost on an individual basis. Contact Hutchins Mfg. Co. for details.
- Any questions about eligibility or program rules should be directed to Glen Bresnahan at 626-792-8211 Ex 15
