Note: These are Standard Hook Type part numbers. Other abrasives manufacturers offer comparable products. Most if not all of the above papers do NOT have holes. Please wet the paper and sanding surface to get started and then the water will flow out around the pad. This will help reduce the chances of grit getting caught on the surface of the sandpaper causing deeper scratches than intended.

SANDPAPER PART NUMBERS FOR MODEL 7004 & 7044

We recommend you use 9" X 11" wet/dry paper. Cut the paper to fit, clip onto the pad. Water will come out from around the paper. You do not need to punch the holes in the paper.
